

# ADVANCE SCAFFOLD COMPETENCY COURSE (LEVEL 3)

## Course Overview

Our structured approach to learning using our Training Modules and Methods of This course is for people who have spent a minimum of six (6) months on site since passing the scaffolding (level 2) course. This course develops your understanding of the appropriate safety regulations and ability to interpret design specifications and statutory regulations when inspecting complex/designed scaffolding structures for faults. The course is delivered via a combination of classroom based tutorials and practical exercises.
